

PROTONET

Make Your Team Work

Protonet Project Management and Collaboration Solution

Protonet delivers a powerful and secure solution to bring people and projects together - dramatically increasing the productivity of workgroups and the privacy of your data.

Protonet Private Cloud Servers

- Data privacy and security compliance of a server located behind your firewall.
- You have complete control over your data and the entire solution.
- Small size and quiet operation allows you to place it on a desktop.
- The eco-friendly solution requires less power than a typical commercial light bulb.
- Everything you need comes pre-installed – you're running in just a push of a button.
- Worry free maintenance requires little IT support and no expensive datacenter space.
- Can be configured to run software other than Protonet SOUL for a single office hub.

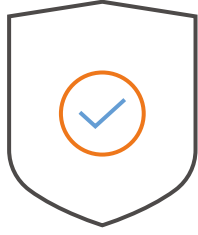

Protonet SOUL

- Easily manage multiple projects yet keep them each self-contained.
- Chats and video calls enable quick sharing of ideas and project updates.
- Manage tasks to prioritize important deliverables and keep the project on track.
- File management offers a simple drag and drop interface to store and share files.
- Shared calendar helps the team remember events and show up prepared and on-time.
- Shared notes document information that the team can easily access.
- Communicate on the go with the iOS® and Android® Messenger apps.

The Protonet Difference

Data Compliance –

Data Located Behind Your Firewall

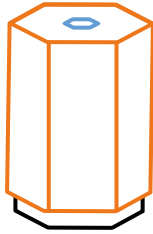

Provides web browser access to applications and data, but allows you to keep your data safely on your server behind your firewall, enabling control over who has access and where data is located. This meets the requirements of many government, industry, and company policies.

Simplicity –

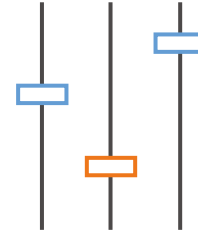

One-button Solution

Designed for non-IT users, the one-button solution enables any firm to have a modern communication platform, leading to efficient collaboration. Personal Servers are small, quiet, and beautifully designed to be placed on your desktop.

Group Productivity in a Box – Everything in One Place

Software applications come pre-installed. With built in Wi-Fi services, data protection, and virus protection, the solution provides an all-in-one workgroup solution with everything in a single server.

Solution Ownership – Control Your Destiny

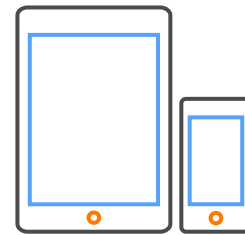

Removes reliance on IT groups busy with multiple priorities and getting locked-in by third-party cloud providers who can change their plans and focus at any time. Now, you can control your own solution!

High Performance –

Faster Data Access & File Uploads

Cloud based solutions need to communicate through slower speed WANs to far-away data centers. The personal server is located in your office through high-speed LANs – providing much faster performance, especially when uploading those large files.

Mobile Collaboration –

Be Connected Anywhere

Not always in the office? Communicate with the team while you're on the go with the Protonet Messenger app on iOS® and Android® devices. You can even share your location so lost team members can find you via a GPS map.

Private Cloud Server Technical Specification

MAYA	CARLITA	CARLA
		
SRP pre Tax £1.199,00 (500 GB); £1.499,00 (2 TB)	SRP pre Tax £2.299,00 (2TB); £2.599,00 (4TB)	SRP pre Tax £3.599,00 (4TB); £4.199,00(12TB); £4.499,00 (18TB)
